

## iF488 Syrian Hamster IgG Isotype Ctrl

|                           |                                 |
|---------------------------|---------------------------------|
| <b>Catalog Number:</b>    | 303905                          |
| <b>Size:</b>              | 25 ug                           |
| <b>Target Name:</b>       | Syrian Hamster IgG Isotype Ctrl |
| <b>Regulatory Status:</b> | RUO                             |

|-------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Clone:</b>                 | MOPC-173-SHamster                                                                                                                                     |
| <b>Application:</b>           | Flow Cytometry                                                                                                                                        |
| <b>Reactivity:</b>            | N/A                                                                                                                                                   |
| <b>Format:</b>                | iF488                                                                                                                                                 |
| <b>Isotype:</b>               | Syrian Hamster IgG                                                                                                                                    |
| <b>Antibody Type:</b>         | Monoclonal                                                                                                                                            |
| <b>Formulation:</b>           | Phosphate-buffered solution, pH 7.2, containing 0.09% sodium azide and 0.2% (w/v) BSA                                                                 |
| <b>Protein Concentration:</b> | 0.2 mg/mL                                                                                                                                             |
| <b>Storage&amp;Handling:</b>  | Store the antibody undiluted at 2°C to 8°C.                                                                                                           |
| <b>Recommended Usage:</b>     | Use at concentrations comparable to those used for the target-specific antibody. iF488 has an excitation max at 491 nm and an emission max at 516 nm. |
| <b>Excitation Laser:</b>      | Blue Laser (488 nm)                                                                                                                                   |

### BACKGROUND INFORMATION

---

This antibody was chosen as an isotype of Syrian hamster control after screening on a variety of resting, activated, live, and fixed mouse, rat and human tissues.
