### BACKGROUND INFORMATION

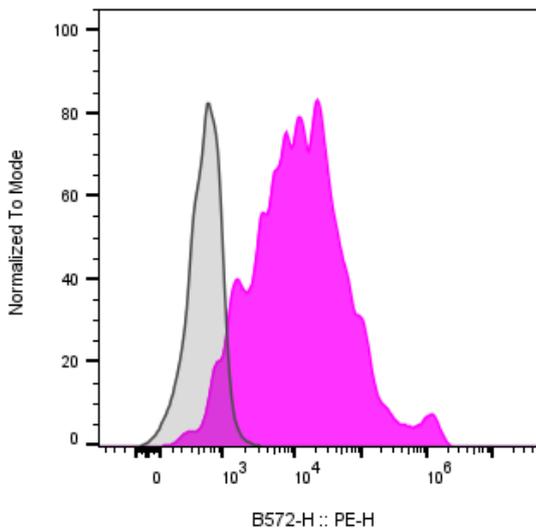

---

This antibody is raised against a synthetic 6xHis peptide. It can be used for Western blotting to detect His-tagged proteins (6xHis or more) at the N-terminus, C-terminus, or within the protein sequence. It is also suitable for flow cytometry or immunofluorescent staining of His-tagged proteins.

PRODUCT DATA

Recombinant protein with His tag is coated at 100ng<sub>mL</sub> (10ng<sub>well</sub>). Anti-His antibody can detect His tagged protein in the dose dependent manner. For ELISA application, this antibody can be used at 0.1-0.3 ug/mL as the detection antibody.

Multi-tag (including His tag) transmembrane protein transfected CHO cells were stained either purified Anti-His antibody clone 1005AB (color-filled histogram) or an isotype control (gray histogram), followed by PE anti-Rabbit IgG secondary antibody.
