### BACKGROUND INFORMATION

---

This monoclonal antibody was generated by immunizing mice with a synthetic peptide corresponding to amino acids 408-438 (EEQKLISEEDLLRKRREQLKHKLEQLRNSCA) of the human c-Myc protein. It specifically recognizes the epitope EQKLISEEDL, a defined sequence within the human c-Myc protein

PRODUCT DATA

Multi-tag protein (catalog 603901) is coated at 100ng\_mL (10ng\_well). Anti-c-Myc antibody (clone 1004AM2b) can detect the Multi-tag protein in the dose dependent manner. For ELISA application, this antibody can be used at 0.01 ug\_mL or lower as the detection antibody.

Multi-tag (including Myc tag) transmembrane protein transfected CHO cells were stained either purified Anti-Myc antibody clone 1004AM2b (color-filled histogram) or an isotype control (gray histogram), followed by PE anti-mouse IgG secondary antibody.
